

Title: Creating Tomorrow's Learner-Centered Environment--Today!

Production Company: Society for College and University Planning

Reorder Information:

Length: Approximately 1 hour of informational session with 1 hour of call-in question/answer

Synopsis:

This video talks about the future of learning and learning spaces. It discusses the importance of these new technological advancements to maintain a competitive edge. Not only will these changes happen in schools, but also in public places such as museums and malls.

After discussing the need for the changes, a group of faculty and other members of universities talk about changes on their campuses and the benefits of these changes.
